

HACKINMOTION 2026 — TECHNICAL PROJECT & AUDIT REPORT

Smart City Issue Reporting & Resolution Platform

Theme: Smart Cities & Civic Tech | Project Code: RICR-HIM-1026

Registered Member: Ayushi Pawar	Evaluation Date: August 14, 2026
Repository: codewithayushi/HackInMotion-RICR-HIM-1026	Deployment: Vercel Serverless (Production)
Stack: React 18, Leaflet, Node.js, Express, Sequelize, SQLite3/MySQL	Status: 100% Core Requirements Implemented

1. Executive Summary & Problem Statement

Every modern urban municipality struggles with daily recurring civic issues: deep potholes, overflowing waste bins, broken streetlights, clean water pipeline leakage, and blocked storm drainage. Traditional grievance redressal systems fail because complaints go into black holes without accountability, lack clear department routing, and suffer from duplicate complaints. The **Smart City Issue Reporting & Resolution Platform (RICR-HIM-1026)** solves this with a two-stakeholder civic-tech application combining interactive GIS geolocation pinning, automated Haversine duplicate detection, department routing, SLA countdown enforcement, and rich citizen/admin dashboards.

2. Hackathon Requirement Compliance Matrix

#	Mandatory Requirement	Implementation Details	Status
1	Two-Role Authentication & Access Control	JWT auth with bcrypt hashing. Role-guarded routes on frontend (/citizen, /admin) and backend middleware (protect, authorize).	COMPLIANT
2	Map-Based Issue Reporting (Citizen)	Leaflet / OpenStreetMap interactive map pinning, colony search autocomplete with Nominatim, Base64 photo uploads.	COMPLIANT
3	Geospatial Duplicate Detection	Custom Haversine formula calculation flagging similar issues within 50m radius with matching category.	COMPLIANT
4	Automated Department Routing	Extensible category mapper routing issues to 6 dedicated queues: Roads, Sanitation, Electricity, Water, Drainage, Public Property.	COMPLIANT
5	Issue Lifecycle & Status Workflow	Full 5-stage workflow: Reported -> Acknowledged -> In Progress -> Resolved -> Closed. Admin resolution notes & timestamps.	COMPLIANT
6	Interactive City Map View	Live Leaflet map with color-coded status pins, SearchBar zooming, and new tab inspection popups.	COMPLIANT
7	Administrator Analytics Dashboard	Chart.js Doughnut (Status) & Bar (Category) charts, Department Performance scorecard, Problem Hotspots, SLA tracking.	COMPLIANT
8	Database Integration & Persistence	Sequelize models (User, Issue, StatusHistory, Upvote, OTP) with dual SQLite/MySQL and serverless store sync.	COMPLIANT
9	Responsive, Clean UI	Tailwind CSS responsive design tailored for mobile citizens and data-dense municipal administrator dashboards.	COMPLIANT
10	Graceful Error Handling	GPS denial fallbacks, 4-tier report hydration in IssueDetailPage, zero blank screens, CI=false build flags.	COMPLIANT

3. System Architecture & Technical Stack

- **Frontend Layer:** React 18 SPA, React Router v6, Tailwind CSS, Leaflet Maps, React-Leaflet, Chart.js, React-Toastify.
- **Backend Layer:** Node.js, Express.js, JWT Bearer Token Security, Helmet HTTP Protection, CORS Policy.
- **Database & Persistence:** Sequelize ORM, SQLite3 / MySQL2, and Vercel Serverless File Store (`/tmp/issues.json`).
- **Third-Party Maps & Geolocation:** OpenStreetMap Nominatim Free Geocoding API + Esri World Geocoder fallback

(100% Free, zero billing friction, client-side direct execution).

- **Deployment:** Vercel Serverless Functions with catch-all routing (`api/index.js`) and GitHub Actions CI compatibility.

4. Core Technical Algorithms & Innovation Highlights

A. Geospatial Duplicate Detection (Haversine Formula)

To prevent redundant dispatch of maintenance crews when multiple citizens report the same pothole or leak, the platform computes great-circle distance between newly submitted coordinates and recent reports:

$$d = 2 * R * \text{asin}(\sqrt{\sin^2(\Delta\text{lat}/2) + \cos(\text{lat}1) * \cos(\text{lat}2) * \sin^2(\Delta\text{lng}/2)})$$

If distance < 50 meters and category matches, a duplicateWarning badge is flagged without blocking the citizen's filing.

B. Automated Department Queue Routing

The system maps complaint categories to municipal administrative departments automatically:

- roads → Roads & Infrastructure Department (Admin: Rajesh Gupta)
- sanitation → Solid Waste Management Department (Admin: Sunita Rao)
- electricity → Public Lighting & Energy Department (Admin: Vikram Singh)
- water → Water Works & Supply Board (Admin: Ananya Sharma)
- drainage → Drainage & Sewerage Board (Admin: Ramesh Patel)
- public_property → Municipal Assets & Parks Department (Admin: Kavita Jain)

C. New Tab Detailed Inspection & Printable PDF Dossier

Both citizens and administrators can click any issue to open a dedicated full-page municipal report in a new tab (/issues/:id). It generates an official grievance document with high-resolution photo evidence, interactive Leaflet GIS map, and live administrative response updates with a window.print() PDF export tool.

5. Primary REST API Endpoints

Method & Route	Access Level	Description & Payload
POST /api/auth/register	Public	Registers citizen with email, 10-digit phone, and password.
POST /api/auth/login	Public	Authenticates user and returns signed JWT Bearer token.
GET /api/issues	Public / Citizen	Returns list of reported issues with category, status, and department filters.
GET /api/issues/:id	Public / All	Retrieves complete single issue dossier, photos, location, and status history.
POST /api/issues	Private (Citizen)	Creates new issue with Base64 photos, coordinates, and auto-duplicate check.
PUT /api/issues/:id/status	Private (Admin)	Updates working condition (in_progress, resolved) with official response notes.
POST /api/issues/:id/upvote	Private (Citizen)	Increments community upvote count for citizen prioritization.
GET /api/admin/dashboard-stats	Private (Admin)	Returns city-wide KPI metrics, SLA performance, and hotspot zones.

6. Pre-Seeded Dataset & Demo Verification Credentials

The platform is pre-seeded with **50 Citizens**, **6 Department Administrators**, and **0 Civic Issues**:

- **Primary Citizen:** aayushipawar2004@gmail.com | Password: password123
- **Roads & Infra Admin:** admin.roads@smartcity.com | Password: admin123
- **Sanitation Admin:** admin.sanitation@smartcity.com | Password: admin123
- **Water Supply Admin:** admin.water@smartcity.com | Password: admin123

VERIFICATION & SUBMISSION SIGN-OFF

This technical lab report certifies that the Smart City Issue Reporting & Resolution Platform (RICR-HIM-1026) satisfies 100% of the hackathon problem statement criteria with clean builds and robust error handling.
